

Philip M. Dyer, PMP

Philip Dyer has over 20 years experience in managing high technology, software development, telecommunications and general business projects and in consulting with and instructing clients in the practical application of project management techniques.

Philip started his career as a software engineer at an Air Force research facility in Tennessee. There he developed real-time process control and data processing systems.

While with Digital Equipment Corporation, Philip managed software development projects for customer custom applications and nationwide telecommunications and general business projects. He instructed staff and customers in practical project management and was on the team that developed Digital's university-level project management curriculum. Philip was also a general business manager including regional operations manager for customer support call centers.

In private practice, Philip has consulted with clients and taught university-level project management applications in a wide range of industries including manufacturing, power distribution, pharmaceuticals, and telecommunications, and for Olgethorpe University and the American Management Association. His clients have included a diverse range from large corporations to law firms and Chambers of Commerce, and he has worked to bring practical project management techniques to small business owners and volunteer organizations including the March of Dimes. He was a Technology Program Manager for the 1996 Olympic Games in Atlanta and a Venue Technology Manager during the 1996 Games.

Philip holds a B.S.E.E. from Tennessee Technology University and did graduate work at the University of Tennessee Space Institute. He has been a consultant to the Board of the ASTD Atlanta Chapter and an officer of the PMI Georgia Chapter. Philip was certified as a Project Management Professional in 1993.
